- 2 · Footer Inconsistencies
- 3 · EIN Disclosure
- 4 · Content & Copy
- 5 · Images & Assets
- 6 · Accessibility
- 7 · Maintainability
- 8 · Content Sensitivity Flag

CATEGORY 1

Functional / Structural Bugs

1

Staging domain used in ALL internal links — site is not launch-ready

BLOCKER

Every internal link, nav link, footer link, hero background image URL, and in-body CTA link across all 7 files points to `https://6kh.a6e.myftpupload.com/...` — the GoDaddy staging domain. None of these files are deployable without a full find-and-replace to `phrfcharities.org`.

Affected files: All 7 (about.html, a-word-from-our-founder.html, contact.html, get-help.html, PHRF-Youth-Program.html, programs.html, PHRF_Full_Site.html)

Fix: Before go-live, do a global find-and-replace of `6kh.a6e.myftpupload.com` → `phrfcharities.org` across all files, then do a second pass to confirm no instances remain.

2

Footer "phrfcharities.org" link has two different href values across pages

BLOCKER

The footer bottom-right shows the text "phrfcharities.org" as a clickable link, but the destination differs depending on which page you're on:

FILE	HREF VALUE
about.html, a-word-from-our-founder.html, contact.html, get-help.html, programs.html	<code>https://6kh.a6e.myftpupload.com</code> (staging)
PHRF_Full_Site.html, PHRF-Youth-Program.html	# — dead placeholder

Fix: Standardize to `https://phrfcharities.org` across all 7 files.

3

Contact form redirect points to production; the other two forms have no redirect at all

BLOCKER

The site has three Web3Forms submission forms. Their post-submit behavior is inconsistent:

FORM	FILE	REDIRECT FIELD
Contact form	contact.html	<code>https://phrfcharities.org/contact.html</code> — points to production (domain may not be live yet)
Youth enrollment form	PHRF-Youth-Program.html	None — undefined post-submit behavior
Sweet Rewards claim form	PHRF_Full_Site.html	None — undefined post-submit behavior

Fix: Decide where each form should redirect after a successful submission and add the hidden `redirect` field to all three forms, pointing to the correct production URL.

4

Youth enrollment form: state field is unconstrained free text

MAJOR

The state input in PHRF-Youth-Program.html is `<input type="text" name="address_state" placeholder="OH / KY / GA">`. The program explicitly restricts to Ohio, Kentucky, and Georgia, but nothing enforces this. A family in California can submit a form and enter "CA" with no error.

Fix: Replace with a `<select>` dropdown with three options (Ohio, Kentucky, Georgia), or add `pattern="^(OH|KY|GA)$"` plus a validation message. A dropdown is strongly preferred — it also prevents case errors.

5

Youth enrollment form has no email field

MAJOR

The enrollment form collects: youth name, youth phone (optional), guardian name, guardian phone (required), street, city, state, and a message. **There is no email address field.** If a guardian's phone number is wrong, incorrect, or unreachable, PHRF has no backup contact method.

This is especially notable because the contact form and the get-help page both treat email as a primary contact channel, and the form intro says PHRF will "follow up with you within 2–3 business days" — requiring a working contact method.

Fix: Add a required guardian email field between guardian name and guardian phone.

6

Desktop nav dropdown is hover-only — broken on touch devices

MAJOR

The "About" nav item reveals a dropdown for "A Word from Our Founder" via CSS `:hover` on `.nav-dropdown`. Touch-screen devices (tablets, touch laptops) do not reliably fire hover events. On those devices the dropdown is inaccessible from the desktop nav — "A Word from Our Founder" is only reachable via the mobile hamburger menu.

The hamburger breakpoint is `max-width: 768px`, so tablets in landscape (typically 1024px) and some large-format tablets will show the desktop nav but can't trigger the hover dropdown.

Fix: Add a JS click-toggle on the dropdown trigger, or change the CSS to show the dropdown on focus as well as hover. Pattern: `.nav-dropdown:hover .nav-dropdown-menu, .nav-dropdown:focus-within .nav-dropdown-menu { display: block; }`

CATEGORY 2 **Footer Link-Set Inconsistencies**

All 7 pages share the same 2-column footer structure (Programs · Organization). The link sets differ meaningfully across pages. A visitor hitting different pages will see a different site map reflected in each footer — confusing and inconsistent.

7 **Programs column: "College grants" present on 2 of 7 pages only** **MAJOR**

FILE	COLLEGE GRANTS LINK IN FOOTER?
PHRF_Full_Site.html	YES
PHRF-Youth-Program.html	YES
about.html	MISSING
a-word-from-our-founder.html	MISSING
contact.html	MISSING
get-help.html	MISSING
programs.html	MISSING

Fix: Add the "College grants" footer link (pointing to `/programs#college-grants` or similar) to about.html, a-word-from-our-founder.html, contact.html, get-help.html, and programs.html.

8 **Organization column: "Founder's story," "Donate," and email link all inconsistent** **MAJOR**

FILE	FOUNDER'S STORY	DONATE LINK	EMAIL LINK
PHRF_Full_Site.html	MISSING	YES	YES
PHRF-Youth-Program.html	MISSING	YES	YES

about.html	YES	MISSING	MISSING
a-word-from-our-founder.html	YES	MISSING	MISSING
contact.html	YES	MISSING	MISSING
get-help.html	YES	MISSING	MISSING
programs.html	YES	MISSING	MISSING

Fix: Decide on one canonical footer Organization column link set and apply it identically to all 7 pages. Recommended set based on frequency: About, Founder's story, Get help, Donate (GiveButter), Contact, contact@phrfcharities.org.

CATEGORY 3 EIN Disclosure Inconsistency

9 "EIN furnished upon request." missing from 2 of 7 pages MINOR

The footer brand block includes `EIN furnished upon request.` on 5 pages but not on about.html and PHRF-Youth-Program.html.

FILE	EIN LINE PRESENT?
PHRF_Full_Site.html	YES
a-word-from-our-founder.html	YES
contact.html	YES
get-help.html	YES
programs.html	YES
about.html	MISSING
PHRF-Youth-Program.html	MISSING

Fix: Add the EIN line to the footer brand block in about.html and PHRF-Youth-Program.html.

CATEGORY 4 Content & Copy Inconsistencies

10 Ohio city list differs between about.html and contact.html — and neither matches the "9 cities" stat on the homepage BLOCKER

STATE	ABOUT.HTML "WHERE WE SHOW UP"	CONTACT.HTML "REGIONAL SERVICE AREAS"
-------	-------------------------------	---------------------------------------

Ohio	Cincinnati, Dayton, Columbus (3 cities)	Cincinnati, Columbus, Cleveland , Dayton (4 cities)
Kentucky	Covington, Lexington, Louisville (3 cities)	Covington, Lexington, Louisville (3 cities)
Georgia	Atlanta, Athens, Macon, Savannah (4 cities)	Atlanta, Athens, Macon, Savannah (4 cities)
Total	10 cities	11 cities

Cleveland appears in contact.html's Ohio list but is completely absent from about.html. Neither total (10 or 11) matches the homepage stat bar which says **"9 cities."**

Fix: Confirm the correct canonical city list with Duane. Update all three locations (about.html, contact.html, PHRF_Full_Site.html stats bar) to match. The "9 cities" figure will also need to be updated if the list changes.

11

College grant program name has four different labels across the site

MAJOR

LOCATION	LABEL USED
programs.html — program heading	"Academic Tutoring and College Grant Support"
get-help.html — step 4	"College Grant Support"
PHRF-Youth-Program.html — offering card	"College grant assistance"
Footer (PHRF_Full_Site.html, PHRF-Youth-Program.html)	"College grants"

Fix: Pick one canonical name for this program and use it everywhere. Recommended: "Academic Tutoring & College Grant Support" to match the programs.html heading.

12

Response time commitment differs between contact.html (1–2 days) and PHRF-Youth-Program.html (2–3 days)

MINOR

contact.html: "A team member will follow up with you within **1 to 2 business days.**"

PHRF-Youth-Program.html: "A program coordinator will contact you within **2–3 business days**" (appears twice on that page).

A visitor who submits both forms will see two different promises. Pick one timeframe and standardize it across the site.

13

"Community Relations Director" referenced but that role doesn't appear on the leadership team

MINOR

get-help.html "Partner With Us" section says: *"Reach out to our Community Relations Director to explore partnership opportunities."*

The leadership team on PHRF_Full_Site.html lists: Duane Darden (Executive Director & Founder), C. Darden (Director of Operations), R. Darden (Youth Program Coordinator OH & GA), H. Conyers (Youth Program Coordinator KY). No Community Relations Director.

Fix: Either add this role to the leadership section on the homepage, or update the get-help.html copy to direct partners to contact PHRF generally.

CATEGORY 5 Images & Assets

14 All non-logo images load from the staging domain — will break after go-live

BLOCKER

Every external image URL across the site points to `https://6kh.a6e.myftpupload.com/wp-content/uploads/...`. When the staging environment is taken down or replaced, all images will break. Affected files and images:

FILE	IMAGES FROM STAGING
a-word-from-our-founder.html	Duane_Founders_Image.png
programs.html	Program1_Image.jpg, Program2_Image.jpg, Program3_Image.jpg, Program4_Image.jpg
PHRF_Full_Site.html	volunteers-scaled.jpg, Sweet_Mix_Image.jpg, Celebration_Mix_Image.jpg
contact.html (hero CSS)	Contact_Hero_Image-scaled.jpg
Other pages (hero CSS)	Likely additional hero images in inline CSS (not yet confirmed — check each page's .page-hero CSS)

Fix: This is handled automatically if the WordPress site is migrated to `phrfcharities.org` and WordPress manages the image paths. If these HTML files are being used standalone, every image URL must be updated.

CATEGORY 6 Accessibility Quick Checks

15 Youth enrollment form uses unwrapped labels without for/id pairing

MINOR

PHRF-Youth-Program.html uses `<label>Youth's full name</label>` followed by a sibling `<input>`, without `for` / `id` linking them. The contact form uses explicit `<label for="first_name">` pairing on every field. The inconsistency between the two forms is a screen reader compatibility issue on the enrollment form — screen readers won't automatically associate the label with its input.

Fix: Add `id` attributes to each input on PHRF-Youth-Program.html and link them via `for` on the corresponding label, matching the pattern used in contact.html.

16 Amber text on white background — color contrast needs manual verification

INFO

The site uses `#E8952A` (amber) as an accent on white backgrounds for eyebrow labels, section labels, and callout text. Amber on white frequently fails WCAG AA contrast for body text sizes (4.5:1 required). This cannot be confirmed without a contrast tool, but it's a known risk with this palette choice.

Action: Run the site's amber-on-white text through a contrast checker (WebAIM Contrast Checker or axe DevTools). If it fails for text smaller than 18px, darken the amber or use it only as a decorative accent with the actual text in a darker color.

CATEGORY 7**Maintainability****17 Nav, footer, and core CSS duplicated across all 7 files — any design change requires editing all 7**

INFO

All 7 HTML files contain near-identical copies of: CSS variables block, nav CSS (~50 lines), mobile nav CSS (~20 lines), footer CSS (~20 lines), mobile-responsive breakpoints, and mobile nav JS (~15 lines). This is expected for standalone HTML files, but it means a single design change — a color tweak, a nav link addition, a footer link fix — must be replicated manually across all 7 files. The current footer inconsistencies (findings #7, #8, #9) are evidence of how quickly this breaks down in practice.

Not a launch blocker, but worth noting: when these files are imported into WordPress/Elementor, the nav and footer should be managed by WordPress theme components, not duplicated per-page HTML. The per-page duplication issue resolves itself at that point.

CATEGORY 8**Content Sensitivity Flag****18 Founder bio discloses juvenile criminal record on a public grant-facing nonprofit page****BLOCKER — REQUIRES LEGAL REVIEW**

This finding requires attorney review before the page goes live. It is not a design or code issue. It is an editorial and legal risk flag.

What the page says: a-word-from-our-founder.html contains a detailed first-person account from Duane Darden that includes explicit disclosure of:

- Time in an orphanage as an infant (mother was 15)
- A violent and turbulent home environment

- An absent/abusive father described as having "29 children"
- Running away from home
- **14 months in juvenile detention** for charges of **assault, criminal damaging, and aggravated burglary**
- Leaving home at age 15

Grant funding risk: PHRF's active grant priorities include the Columbus Foundation Opportunity Youth Grants. Foundation grants often require leadership background disclosures. Having the founder's juvenile record voluntarily published in full detail on a public page — rather than disclosed proactively in a grant application with context — may raise flags with program officers who discover it during due diligence without any framing from PHRF.

Legal risk: Depending on the state and the age at which the offenses occurred, juvenile records may be sealed or expunged by law. Voluntarily publishing the specific charges on a public website may have legal implications. An attorney familiar with Ohio (or the applicable state's) juvenile expungement law should review before go-live.

PR risk: Press coverage of PHRF will lead journalists directly to this page. Once public, PHRF loses control of how this narrative is first introduced to audiences who have no context for the redemption arc. The current page leads with the story and the charges appear partway through — but a journalist pulling a quote out of context could frame it differently.

This is not a recommendation to remove the content. The founder's story is clearly intentional and the redemptive arc is exactly the kind of narrative that makes PHRF's mission credible and human. The flag is: has an attorney reviewed this page specifically? Has Duane made this decision with full awareness of the grant and legal implications? If yes, proceed. If not, pause before go-live.

Options to consider:

- Attorney review of juvenile record disclosure legality in the applicable jurisdiction
- Proactive outreach to the Columbus Foundation program officer before go-live, rather than having them discover it during review
- A version of the page that conveys the full weight of the story without specifying the individual charges (e.g., "juvenile detention" without the specific charge names)
- A brief contextual framing paragraph at the top of the page before the detailed account

What Passed — No Issues Found
